

VALUE AUTOMATION SYSTEMS

EL-O-Matic offers valve automation systems consisting of Butterfly, Ball, Plug and Damper valves with pneumatic or electric actuators for both on / off and modulating application. EL-O-Matic executes thousands of systems yearly, tailor made for the specific application of the industry. Some of the applications are very fast operating systems, sequencing of valves, batching operation. We also supply systems for defense and nuclear power for their critical high and low temperature applications.
